

PMA-LINER MANHOLE SYSTEM

PMA LINER

FULLY LINED MANHOLE
INCLUDING JOINT LINING

PMA-LINER-MANHOLE SYSTEM

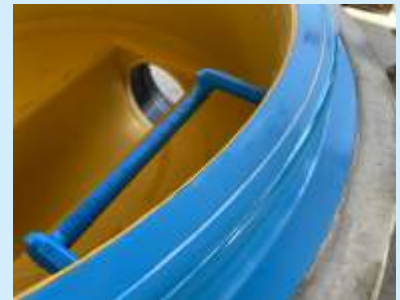

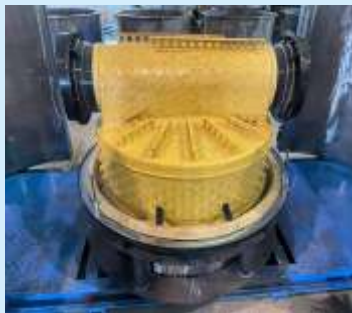

PMA-liner with PP-CORPROTECT® full lining

Concrete and PREDL® manhole bases have always been the perfect combination.

The new PMA liner manhole system from PREDL®, in combination with the PP-CORPROTECT® full lining, enables a completely corrosion-protected manhole system including joint lining with integrated sealing system and load transfer according to DIN4034 Part 1 .

The combination of the PREDL® manhole with PP-CORPROTECT® and the new joint connection system, guarantees a high level of corrosion protection in the entire manhole area.

- no more joint sealing necessary on construction sites
- corrosion protection pH1-13
- high service life for heavily used manholes

PMA JOINT LINING
